Calculator

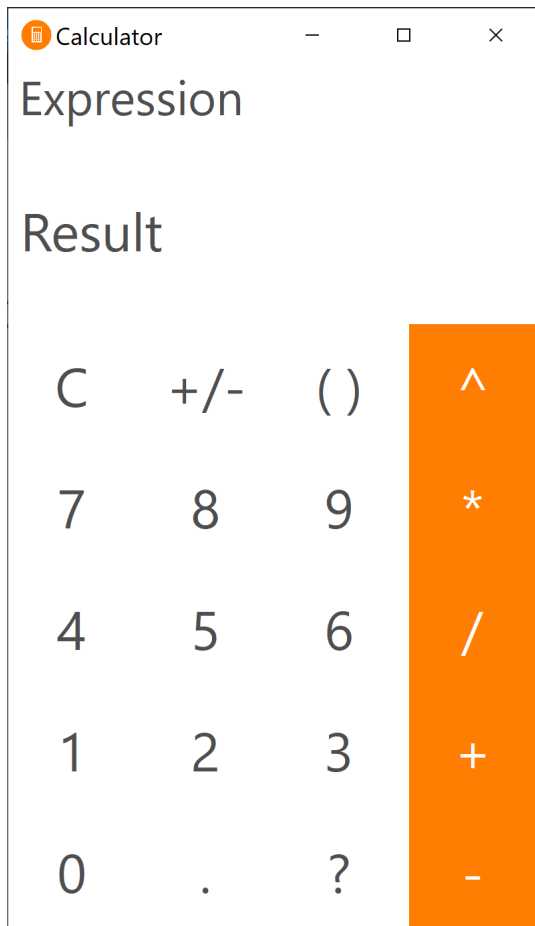

A modern arbitrary precision reverse polish notation mathematical calculator with built-in keyboard shortcuts and history buffer support.

Feature tracker

- ☐ Settings button
- ☒ Order of operations
- ☒ Infinite precision decimals
- ☒ Automatic expression calculation
- ☒ Application resizing
- ☒ Easy to use sign/parenthesis insertion functionality
- ☐ Auto detect text overflow in expression/result label

☐ Keyboard shorcut support
☐ History buffer support
☐ Refactoring/Comments

Keybinds

Keybind	Action
C	Copy
V	paste
c	Clear
s	Insert sign
p	Insert parentesis
+	Add
-	Subtract
*	Multiply
/	Divide
ˆ	Exponentiation
Up	Undo
Down	Redo

Expression

Operator	Operation
**	Exponentiation
*	Multiplication
/	Division
+	Addition
-	Subtraction

Warnings

This is a single-threaded application which does not provide any failsafe for expressions that might are too big to compute
